APPLICATION FOR PERMIT TO DRILL A WELL FOR OIL, GAS, GEOLOGICAL TEST,
BRINE DISPOSAL, OR KEY WELL FOR SECONDARY RECOVERY

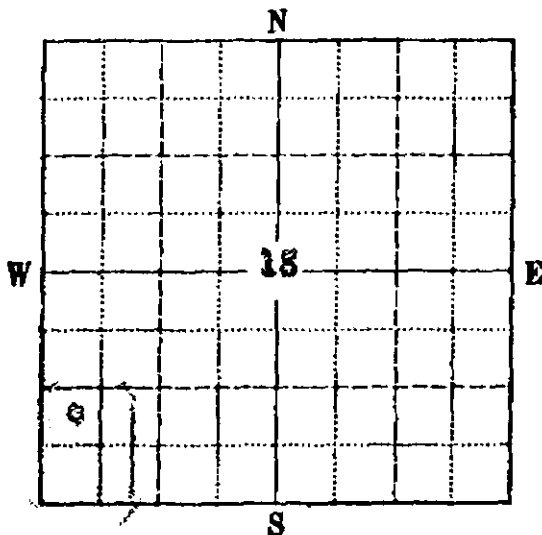

Under Authority of Act 61, P. A. 1939 and Act 326, P. A. 1937

See Reverse Side Before Filling Out This Application

Department of Conservation
Geological Survey Division
Lansing 13, Michigan
Gentlemen:

Allegan, Michigan January 25, 1952

Application is hereby made for permit to drill a well for Oil

(Locate well and lease accurately on
this section plat—640 acres)

Acres in lease 30

Locate well in two directions from nearest lines of quarter section and property ownership lines:—

990 ft. from ~~North~~ south line of quarter section, 330 ft. from ~~East~~ west line of quarter section;

330 ft. from ~~North~~ north property line, 330 ft. from ~~East~~ west property line.

Number of feet from nearest producing well 660 Kind of tools to be used cable

Well is to be completed in Traverse formation. Intended depth 1375'

Program of casing, sealing, and completing well Drift, Coldwater, Antrim and Traverse. Drive 8" pipe through the drift. Set 6-5/8" casing on a cave or water string if necessary. Set 5-3/16" casing on top of the Traverse. All oil, gas and/or water encountered to be confined to the formation in which it occurs.

Well location is in Cleared farm land
Cleared farm land. Open grass land. Brush land. Timbered land.

Are there any lakes, rivers, streams, ditches, drainage-ways, swamps or marshes nearer than 330 feet from well location?
no If yes, describe and give distance from location and specify precautions to be taken to protect fresh water from well wastes.

Are there any buildings or other structures within 75 feet of the proposed location? no
Yes—No

Applicant agrees to comply with the provisions of Act 61, Public Acts of 1939, and Act 326, Public Acts of 1937, and rules and regulations pertaining to the locating, drilling, casing, sealing, completing, producing, and plugging of wells.

Applicant will notify the nearest field office of the department when ready to commence drilling operations.

Address correspondence and permit to Louis Zellman, P. O. Box 114, Allegan, Michigan

Describe the proposed work in detail.

Fill the bottom hole from the total depth to 730' using approximately 205 pails of mud.

Bridge solidly at 133' and fill to the 3" drive pipe using 25 pails of mud.

Start the 3" drive pipe and fill to the surface with pit mud, as the drive is being pulled.
If the drive pipe is to remain in the hole temporarily, cover over safely at the surface.

CALL THE DEPARTMENT OF CONSERVATION AT ALLEGAN (PHONE 89) BEFORE 9:30 A.M. WHEN READY TO START PLUGGING OPERATIONS AND WHEN READY TO START DRIVE PIPE.

Plugging equipment on the location shall include a line of sufficient length to run to the total depth and tools of sufficient size and weight to assure the proper cleaning out of obstructions and setting of required bridges.
